EDUCATION

University of Washington, Seattle

Sep 2025 – June 2027

Master of Science in Information Management, specializing in Data Science & AI (GPA: 4.0)

Nankai University

June 2025

Bachelor of Management in Exhibition Economy and Management (GPA: 3.6)

WORK EXPERIENCE

Product Data Analyst Intern | Dewu

Nov 2024 – Jan 2025

- Conducted weekly product and category performance analyses using **SQL and Excel**, identifying traffic inefficiencies and user behavioral trends; delivered **visualized reports** to guide product and marketing teams' strategic focus.
- Designed and evaluated multiple **A/B tests** on recommendation strategies, tracking metrics such as UV value, CTR, and category-level new users; insights led to a **+0.61%** increase in T+7 UV value and **+2.52%** growth in new-category users.
- Collaborated with strategy and DS teams to analyze **user segmentation** via **K-means** and define optimized audience targeting frameworks, improving metric alignment and OKR clarity across teams.
- Investigated causes behind category-level performance drops through **SQL-based root-cause analysis**, developing an **SOP** for identifying business anomalies and improving analytical efficiency across teams.

Data Analysis Intern | Unilever

Sep 2024 – Nov 2024

- Extracted and analyzed consumer and sales data using **SQL and Excel** across 10+ brands, measuring key metrics such as ROI, GMV, and repurchase rate; insights supported sales strategies and led to a **5%** increase in repurchase rate.
- Designed and validated audience segmentation strategies using **AARRR and 5A models**; conducted **A/B testing** to optimize ad targeting, expanding potential customer reach to **10M+** and improving campaign ROI.
- Built and maintained **Power BI dashboards** with 30+ KPIs to visualize ad performance and sales outcomes, enabling cross-functional teams to make data-driven marketing decisions in real time.

Sales Support & Data Analysis Intern | Pfizer

Jul 2024 – Sep 2024

- Conducted comprehensive sales performance analysis using **Excel pivot tables** and advanced formulas like **VLOOKUP, COUNTIF, UNIQUE**, tracking key quarterly metrics such as growth rate, product performance, and activity ROI to support strategic decision-making.
- Automated manual reporting workflows by developing a dynamic Excel model for cross-team data entry and metric standardization, cutting weekly data processing time by **50%** and enhancing reporting consistency across regions.
- Created **visualized reports** using a variety of charts and quarterly dashboards to uncover insights on product potential, market capacity, and competitor trends, enabling sales teams to refine business plans.
- Collaborated** with cross-functional teams including sales, marketing, and operations to align project execution and data reporting, ensuring compliance with corporate processes and timely delivery of materials.

Marketing Intern | Cargill

Jan 2024 – Jun 2024

- Analyzed dairy and plant-based milk markets across APAC, Europe, and North America, consolidating **1,000+** data points to identify **growth trends and consumer insights** for product development.
- Visualized key findings through analytical slides, enabling sales and R&D teams to refine market-entry and positioning strategies.
- Applied Excel-based analysis (**pivot tables, CAGR, data cleaning**) to improve market forecast accuracy.
- Managed Cargill's participation in Boao FHE and the Dairy Annual Conference from booth design to post-event analytics, driving a **25% increase** in potential clients and securing 57 qualified leads.

SKILLS

Programming: Python (NumPy, Pandas, Scikit-learn, Statsmodels), SQL (MySQL, Window Functions), R

Tools & Technologies: Excel, Tableau, Power BI, Python (Matplotlib, Seaborn), Figma, Canva, Photoshop

Core skills & Competencies: A/B Testing, Hypothesis Testing, User Segmentation, Supervised Learning (Linear Regression, Logistic Regression), Unsupervised Learning, Statistical Modeling, Cross-Functional Communication, Leadership, Problem Solving

Coursera Certificates: Data Analysis with R Specialization (probability and statistics), SQL for Data Science

ACADEMIC PROJECTS

Sound Quest – 2nd place, Husky Hack

Nov 2025

Designed a data-driven solution to help users maximize their financial benefits through gamification and personalized insights.

- Developed a consolidated insights dashboard summarizing benefit usage, cashback opportunities, and repayment timelines to support data-driven decision-making.
- Defined event tracking and user segmentation logic (search logs, reward logs, repayment behavior) to analyze engagement patterns and evaluate gamification effectiveness.
